

Facet Solutions Scoop NE Business Award.

Facet Solutions Ltd were nominated for the Best Business Start-up category in the Northumberland Business Awards held on Thursday 15th November 2012 at Linden Hall Northumberland. The judges commented that the standard of nominees this year was extremely high and all finalists should be complimented. Under stiff competition Facet Solutions owner David Steel is delighted at winning, he commented "I am quite shocked at winning this award, on realising the standard of entrants this year, I am humbled"

Facet Solutions was established in 2010 as a Business Growth & Development Consultancy working for companies with growth aspiration and potential, Facet Solutions success has been achieved through the development of specific growth programs as well as a Leadership and Management offer to include DiSC[®] Behavioural profiling and facilitated programs. This blended offer has proven to deliver measurable improvements within clients, businesses realise a true ROI.

David Steel has innovated not just through the capabilities within Facet but also from developing partnership arrangements. This has led to the formation of CoAssure, a unique assured package delivered through four firms. Facet has partnered with two other companies to develop NMS Associates a National business with a niche offer to the Dentistry sector, delivering a product and consultancy offer. They are in discussions with an American Partner to bring a new approach to the UK dental sector.

When asked about why he believes Facet Solutions won the award, David commented "Facet has been very creative when engaging with clients to support them in realising their true potential. This has been achieved by aligning the offer to the Regional and National Growth Strategies. In addition to this, I am fortunate to be involved with two further business start-up businesses, NMS Associates and CoAssure".

David went on to say "winning this award gives Facet Solutions the confidence to continue to develop the business further".
